PROFESSIONAL SUMMARY

Fullstack Developer with 6+ years of experience and **2 official AWS certifications: AWS Certified Cloud Practitioner and AWS Certified AI Practitioner**. Expertise in fullstack development, cloud architecture, infrastructure as code, data and generative AI, participating in the entire development and operation cycle of systems in production.

Experience in **enterprise Data Lake platform and international B2C product**, with deliveries involving web applications, APIs, AWS infrastructure, ETL pipelines, payments, CI/CD, security, governance and AI solutions. Hands-on profile, focusing on development, architecture, problem solving and evolution of digital products.

PROFESSIONAL EXPERIENCE

Fullstack Developer | Global Hitss

Jan. 2024 – Current | Remote

LakeIT Project: Enterprise data platform on AWS for ingesting, processing, governing, querying, and exploring data with AI.

- I build and evolve **APIs, interfaces, pipelines and cloud integrations** with Node.js, TypeScript, Next.js, Python and AWS.
- Restructured the AWS infrastructure with **Terraform and Terragrunt**, standardizing reusable modules and managing **3+ environments**, contributing to reduce costs from **over $2,300 to $800–1,000/month**.
- I implement **ETL pipelines and event-driven flows** with Python, AWS Glue, Lambda, S3, SQS, SNS, Step Functions and Athena.
- I implemented solutions with **Amazon Bedrock**, including RAG, conversational memory, SQL Athena generation, schema querying, and natural language data visualization.
- Improved **governance, security, CI/CD, and observability** with Lake Formation, Cognito, IAM, RBAC, GitHub Actions, OIDC, and CloudWatch.
- I participated in an initiative at **GCP** with Vertex AI, BigQuery and data services.
- I work in **refinements, technical prioritization and Scrum/Kanban**, as well as presentations and technical training for customers and users.

Freelance Fullstack Developer / Technical Manager | Futbuynow

Feb. 2023 – Aug. 2026 | Remote | On-demand performance

FutBuyNow Project: International B2C marketplace platform for digital products and services in the gamer segment, with payments, sellers, affiliates, loyalty and real-time operations.

- I evolve the architecture of a platform with **4+ years in production, +65 thousand orders processed and +30 billion coins traded**.
- Contributed to the evolution of the operation from approximately **1,483 to 3,407 paid orders/month**, comparing Oct–Dec/2023 with May–Jul/2026.
- I structure and maintain **monorepo** with Node.js/Express API, Next.js website and React/Vite dashboard, using TypeScript, Prisma, MySQL, Redis and Socket.IO.
- Implemented **transactional flows with OpenPix, Stripe and PayPal**, including webhooks, business rules, payment status and automatic order update.
- I built **marketplace, sellers, affiliates, and loyalty** modules, including automated commissions, referrals, administrative dashboards, and product and service management.
- Expanded the platform to **16 languages** and drove technical SEO improvements, achieving **+1.5 million impressions and +21k organic clicks on Google in 12 months**.
- Evolved **infrastructure, security, and reliability** with AWS, Vercel, Railway, and Cloudflare, including rate limiting, error handling, and protection against abusive traffic.
- Structured **AI agents, skills and MCP integrations** to support development, analytics, content, payments and infrastructure.

TECHNICAL POWERS

Backend & Languages: Node.js, TypeScript, JavaScript, Python, Express, NestJS, REST APIs, GraphQL, Prisma

Frontend: React, Next.js, Tailwind CSS, ShadCN, Chakra UI, React Query, SSR, SSG, ISR

AWS & Cloud: Lambda, ECS/Fargate, S3, RDS, Glue, Athena, Bedrock, Step Functions, SQS, SNS, EventBridge, Cognito, IAM, Lake Formation, CloudWatch, CloudFront

DevOps & Architecture: Terraform, Terragrunt, Docker, GitHub Actions, CI/CD, AWS SAM, CloudFormation, Serverless, Event-Driven Architecture, Clean Architecture, SOLID, RBAC

Data & AI: Data Lake, ETL, PostgreSQL, MySQL, Redis, Generative AI, LLMs, RAG, AI Agents, Tool Calling, Prompt Engineering, MCP

GCP: Vertex AI, BigQuery, Dataplex, Cloud Storage

CERTIFICATIONS AND COMPLEMENTARY TRAINING

AWS Certified Cloud Practitioner (CLF-C02) - Amazon Web Services | Sept. 2026
Certificate: https://www.credly.com/badges/2e86b275-895d-49f4-807e-d6e264ef47e4

AWS Certified AI Practitioner (AIF-C01) - Amazon Web Services | Sept. 2026
Certificate: https://www.credly.com/badges/f21d87ea-e9df-46b9-9d0b-938f728f79b6

AWS Serverless Demonstrated - Amazon Web Services | Aug. 2026
Certificate: https://www.credly.com/badges/c12ab3fd-2e95-4f3e-b4db-9d1eb75be81d

AWS Technical Essentials - AWS Skill Builder | 2025

JavaScript and TypeScript from Basic to Advanced - Udemy | 146h | Feb. 2023
Certificate: https://www.udemy.com/certificate/UC-497ce18e-50ae-44eb-8a8e-664cf2128781

COMPLEMENTARY PROJECTS

NexSift: Editorial platform with AI, verified sources, and multilingual publishing. Next.js, AWS, Terraform, Lambda, and MCP.

The Monkeynauts: Web3 play-and-earn platform with React, Express, Prisma, PostgreSQL, Clean Architecture, SOLID, and blockchain integration.

Kaguya: Monorepo study platform with Next.js, NestJS, GraphQL Federation, Prisma, PostgreSQL and RBAC.

AWS IaC Blueprint: Reproducible AWS infrastructure with Terraform, Terragrunt, reusable modules, multiple environments, and LocalStack.

ai-i18n-translate: TypeScript library published in npm for translating i18n files with AI, preserving structure and placeholders.

EDUCATION

Systems Analysis and Development – Uncomplicates UniAmérica
Technology Course | Graduation Completed in Jul. 2026

LANGUAGES

Portuguese: Fluent / Native | **English**: Technical for documentation, code and tools | **Spanish**: Basic
